27" QHD (2560 x 1440) high resolution display

The all-new Mi 2K Gaming Monitor 27" comes with a sharp 2560 x 1440 QHD picture quality to present every detail needed for immersive gaming. Having an extraordinary viewing angle of 178° and ultra-slim bezels, the 27-inch large IPS panel offers a clear and seamless viewing experience for multi-monitor setup.

165Hz superior refresh rate for fluid gaming experience

To help keep you in the first place no matter what game you're playing, Mi 2K Gaming Monitor 27" utilizes a silky smooth 165Hz high refresh rate as well as a top-of-the-line response rate as low as 1ms IMBC¹. It also features Adaptive-Sync technology to eliminate screen tearing, ensuring ultra-smooth and stable imaging during intense gaming.

Vibrant colors with 95% DCI-P3, HDR400

No gaming experience is complete without stunning colors. Mi 2K Gaming Monitor 27" supports up to 132% sRGB wide color gamut, 95% of the DCI-P3 color range, and a native 8-bit color system that can accurately produce 16.7 million colors. The display offers 400cd/m² typical brightness and an enhanced picture detail with VESA DisplayHDR™ 400. With all these features, the device is not only made for entertainment, but is also perfect for displaying professional imaging content.

TÜV Rheinland certified Low Blue Light for comfortable viewing

Mi 2K Gaming Monitor 27" is TÜV Rheinland Low Blue Light certified, ensuring protection on users' eyes even during extended gaming sessions. Mi 2K Gaming Monitor 27" is adjustable in height, tilt, swivel, pivot control, and even wall-mountable, so users can easily adjust the monitor to match their idea viewing angle.

¹When the refresh rate reaches 165Hz, the IMBC response time reaches 1ms as well. When the refresh rate is 144Hz, the IMBC response time would be 2ms. When IMBC is activated, brightness of display might vary.

² GTG response time deviation within ± 1ms
